Career Objective

I want to find meaningful work as a software engineer or data analyst. I am interested in remote, part-time work.

Education

Bachelor of Science in Computer Science, *Westminster College*, June 2020 (expected)
Cumulative GPA: x.x, Computer Science GPA: x.x

Work Experience

Data Analyst (Internship), *Snap Finance*, May 2018 - May 2019

Gathered and processed information about users. Wrote scripts to generate automated reports and graphs (daily, weekly, monthly) for executives. Used Python, Flask, Angular, Typescript, and SQL (Postgres).

Merchant Support Representative, *Snap Finance*, August 2017 - May 2018

Assisted Snap Finance merchants (partners), processed loan applications, and answered general questions.

Skills and Interests

Languages/Frameworks: Java, Python, iOS Development(Swift & SwiftUI), JavaScript/TypeScript, Angular, Git, C, HTML, SQL

General: Algorithm Design & Analysis, Data Structures, Database Systems

Strong interpersonal and communication skills

Superpower: curiosity. I love to learn, read, ask questions and challenge myself to come up with new ideas and better ways of doing things.

In addition to computer science I am interested in philosophy and golf. I competed on my high school varsity golf team from 2011-2014, including winning the Utah State Championship my sophomore year, qualifying for the Eddie Hogan Cup (top four Utah juniors) and Swire Cup (by invitation). I also played on Westminster College's golf team during my freshman year.
